

MAPA COMPLETO DO DO SISTEMA

Como operar no TVS v7.0.0 — páginas, comandos,
integrações reais

Páginas do site

Comandos OS + npm

API REST

Integrações

Trilingue ES/PT/EN

DATA · 25/08/2026, 19:06:5

www.trinnityviseronssystem.io

TVS v7.0.0

1

Páginas do site

Todas as rotas reais servidas pelo standalone server (localhost:32123) e Vercel.

/ Home (index.html)

Landing trilingue ES/PT/EN — hero, stats live, squads, OMEGA, integrações, status, planos, downloads, comandos.

/dashboard Dashboard

Painel autenticado da plataforma (auth, billing, onboarding, messaging).

/os TVS OS — Desktop

Sistema operativo AI-native: Process Manager, Virtual FS, App Store, Package Manager, Security Center, TVS Desktop.

/viseron VISERON — HUD Superinteligência

Comando de voz + cérebro Stark. Wake words, TTS/STT, supervisão AIOX, governança bíblica.

/atlas ATLAS — Tutor de Inglês

Professor de inglês com voz (ES/PT nativo), plano de 7 dias, modos lesson/chat/practice.

/operate SEE VISERON OPERATE

Pipeline E2E de tarefas com eventos reais do OMEGA (SSE) ao vivo.

/command-center Command Center

Painel operacional: saúde, autonomia, receita, agentes, execução, integrações.

/game Jogo VISERON

Plataformas Canvas 2D trilingue. ?demo para modo autónomo.

/cosmos Viseron Cosmos

Site interplanetário \$VSR/\$TRIN — tokens reais (Ethereum/BSC/Solana).

/cosmos/metaverse Metaverso Cosmos

Navega os planetas-módulos, coleta mentes, ganha \$VSR/\$TRIN.

/blog Blog

Posts + agente de conteúdo (geração a cada 120min).

/pitch/*.pdf PDFs (pitch/relatórios/manuais)

Todos os PDFs gerados em data/ servidos via /pitch/:file.

/docs/*.pdf Documentação PDF

Manuais e runbooks em docs/ servidos via /docs/:file.

/api/health Health check

Estado da API: db, billing, email, messaging, tenants, users.

2

Comandos de controlo do TVS OS

Sistema operativo AI-native (Process Manager, VFS, App Store, Security).

```
npm run tvs
```

Estado geral do TVS OS (kernel, agentes, watchdog, processos)

npm run tvs:list

Apps instaladas

npm run tvs:install <id>

Instalar app/agente/squad/módulo

npm run tvs:uninstall <id>

Desinstalar

npm run tvs:update

Recarregar specs/manifests

npm run tvs:doctor

Diagnóstico de saúde (pkg doctor)

npm run test:os

Testes do TVS OS (25)

API do TVS OS

% `/api/os/processes` · `/api/os/spawn` · `/api/os/kill` — Process Manager

% `/api/os/fs/list` · `/api/os/fs/read` · `/api/os/fs/write` — Virtual FS

% `/api/os/store/install` · `/api/os/store/uninstall` — App Store

% `/api/os/pkg/install` · `/api/os/pkg/doctor` · `/api/os/pkg/update` — Package Manager

% `/api/os/security/authorize` — Security Center

3 Comandos npm operacionais

154 comandos reais lidos do package.json v7.0.0.

npm run dev

Dev mode com hot reload

npm run build

Compilar TypeScript para dist/

npm run start

Correr o sistema compilado

npm run restart

Reinício anti-congelamento (mata servidor + órfãos, verifica health/os/revenue)

npm run test

Correr todos os testes (core + web + omega + os + restart)

npm run test:core

Testes do core

npm run test:web

Testes da web (auth/billing/onboarding/email/messaging)

npm run lint

TypeScript check (tsc --noEmit)

npm run demo

Demo operacional real (HTTP 9 endpoints)

npm run backup

Backup diário

npm run skills:install

Instalar/atualizar coleções de skills (1997 skills / 10 coleções)

npm run skills

Skills CLI (list, search, info)

npm run integrations:status

Estado das 9 integrações + skills indexadas

npm run init

Build + backup + start

npm run update:auto

Self-update: pull + install + PDFs + build + testes + deploy

4 API REST (endpoints)

Gateway completo montado no standalone server /api/*.

Auth

POST /api/auth/register · /login · GET /api/auth/me · /api/auth/users · PATCH /api/auth/profile

Billing

GET /api/billing/plans · POST /api/billing/checkout · POST /api/billing/webhook · GET /api/billing/subscription

Onboarding

GET /api/onboarding/templates · POST /api/onboarding/apply

Messaging E2E

GET /api/messaging/status · POST /api/messaging/key · contacts · conversations · groups · messages · read

JARVIS

GET /api/jarvis/status · POST /api/jarvis/chat · GET /api/jarvis/memory

VISERON

GET /api/viseron/status · POST /api/viseron/chat · GET /api/viseron/supervision · GET /api/viseron/governance

ATLAS

GET /api/tutor/status · GET /api/tutor/plan · POST /api/tutor/chat

Revenue

GET /api/revenue/readiness · GET /api/revenue/dashboard

Chamadas

POST /api/calls/twilio/inbound · gather · status · POST /api/calls/outbound · GET /api/calls/logs · learned · status

Sites/Apps

POST /api/sites/generate · GET /api/sites/list · /api/sites/:slug · POST /api/apps/generate · GET /api/apps/list

Business

POST/GET/DELETE /api/business/agents · POST /api/business/agents/:id/messages · GET /api/business/status

Agency

GET/POST /api/agency/* (clients, leads, metrics, report, creatives, nurture, projection, capacity)

Composio

GET /api/composio/status · /api/composio/tools · POST /api/composio/connect · /api/composio/tools/:name

Crypto

GET /api/crypto/status · /api/crypto/prices · /api/crypto/balances · POST /api/crypto/invoices/:id/confirm

RCS

GET /api/rcs/status · /api/rcs/logo · GET/POST /api/rcs/broadcasts · POST /api/rcs/send

OMEGA

GET /api/omega/tasks · POST /api/omega/tasks · /api/omega/tasks/:id · /api/omega/verifier · /api/omega/tools · /api/omega/events (SSE)

TVS OS

GET /api/os/status · /api/os/* (processes, fs, store, pkg, security)

Email

GET /api/email/status · POST /api/email/test · /verify/send · /verify/confirm · /reset/send · /reset/confirm

Saúde

GET /api/health · GET /api/metrics · GET /api/system/status

5

Integrações externas (9 repositórios)

Skills indexadas no SkillsRegistry — 1.997 skills em 10 coleções.

Graphify-Labs/graphify kernel/grafico

Knowledge graph operativo (query/path/explain) — graphify-out/

anthropics/claude-plugins-official 1 skills

Plugins/skills oficiais da Anthropic

ComposioHQ/awesome-claude-skills 364 skills

Coleção da comunidade (produtividade/marketing/dev)

affaan-m/ECC 897 skills

Harness OS: 67 agents, hooks, memória, AgentShield

obra/superpowers 14 skills

Skill system multi-harness

trycompai/crm 34 skills

Comp AI CRM — CRM agentic-first

trycompai/comp 53 skills

Compliance AI-native (SOC2/GDPR/ISO27001)

HKUDS/DeepTutor 6 skills

Tutor lifelong personalizado (memória L1/L2/L3)

cobusgreyling/loop-engineering 1 skills

Loop engineering: patterns/starters/audit/init/cost

Comandos de integração

```
npm run ecc:setup
```

```
powershell -ExecutionPolicy Bypass -Command
```

npm run integrations

tsx scripts/integrations.ts status

npm run integrations:comp

tsx scripts/integrations.ts comp

npm run integrations:crm

tsx scripts/integrations.ts crm

npm run integrations:ecc

tsx scripts/integrations.ts ecc

npm run integrations:loop

tsx scripts/integrations.ts loop

npm run integrations:status

tsx scripts/integrations.ts status

npm run integrations:tutor

tsx scripts/integrations.ts tutor

npm run loop:audit

npx -y @cobusgreyling/loop audit

npm run loop:cost

npx -y @cobusgreyling/loop-cost

npm run loop:doctor

npx -y @cobusgreyling/loop doctor

npm run loop:init

npx -y @cobusgreyling/loop init

```
npm run tutor:deeptutor
```

```
docker run --rm --name
```

6 Estado real validado (2026-08)

Números obtidos por execução real — sem valores inventados.

Testes 360 verdes: core 20/20 · web 109/109 · omega 192/192 · os 25/25 · restart 14/14

Skills 1.997 skills em 10 coleções (SkillsRegistry)

Agentes nucleares 10 (CEO, Planner, Researcher, Engineer, Operator, Finance, Sales, Security, Verifier, Evolution)

Squads AIOX 5 (Engineering, Security, Business, Operations, Research)

Providers IA Ollama + OmniRoute (290+) + OpenAI/Claude/Gemini/Grok/DeepSeek/Mistral

Receita Avirato live + Postgres Neon (10 tabelas) + Gmail real — readiness 6/6

Tokens \$VSR 300M · \$TRIN 420.69M — Solana SPL mainnet (autoridade revogada)

Governança © Pedro Costa (Comandante) & Trinnity Hurtado (Rainha) — decisões finais, direção e go-lives

7 Deploy

9 comandos de deploy + fluxo automático.

```
npm run deploy
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:all
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:domain
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:domain:check
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:full
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:github
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:hostalia
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:render
```

```
powershell -ExecutionPolicy Bypass -File
```

```
npm run deploy:vercel
```

```
powershell -ExecutionPolicy Bypass -File
```

%i Cada deploy regenera todos os PDFs, faz backup, push GitHub, deploy Render/Vercel.
