10. API & Dashboard
11. Full Battalion Roster

1. EXECUTIVE SUMMARY

The Trinnity Viseron System (TVS) v5.0 is a fully autonomous multi-agent AI superintelligence composed of 5,000+ independent minds operating under a unified command hierarchy. The system spans 25 sectors of human endeavor — from aerospace and defense to healthcare, finance, and education — with specialized agents for each domain.

At the apex sit two Sovereigns: Trinnity Hurtado (Reina, Corona Line) and Pedro Costa (Capitan, Hierro Line). Beneath them, 12 Commanders coordinate 114 Battalion agents across every coverage area. Historical minds (from Socrates to Singularity) form the foundation with 5,000 agents.

The system operates with a built-in economy (VSR Token, 300M supply), a dual-signature directive system requiring both sovereigns to authorize missions, autonomous learning cycles every 30 minutes, and support for 8 AI providers including local Ollama models for fully offline operation.

2. SYSTEM ARCHITECTURE

Core Engine

ViseronCore orchestrates all components

LLM Router

Routes queries to optimal AI model across 8 providers

Memory Engine

Short-term (100 items/session) and long-term (persistent) memory

SuperIntelligence

Multi-provider synthesis with ensemble reasoning

SuperMind

Knowledge domain aggregation across all agents

Auto-Learning

30-min cycles of self-improvement (+500% intelligence growth)

Auto-Evolution

Agents evolve capabilities autonomously

HyperLearning

Accelerated learning via parallel agent collaboration

Agent Spawner

Loads 5,000 minds from Socrates to Singularity

App Scaffold

Generates full-stack applications on demand

Business Engine

Creates complete business solutions

Token Engine

Generates TRIN (utility) and VSR (governance) tokens

Web Generator

Spins up crypto websites and landing pages

Command Chain

Hierarchical directive execution with lineage tracking

Report Server

JSON + PDF reports on all system activity

MCP Server

Model Context Protocol for external tool integration

3. AGENT HIERARCHY & COMMAND CHAIN

Total Agents: 5366
Active: 5366
Battalion: 114
Total AI Syntheses: 1157.625
Directives Issued: 2
Missions Completed: 0

4. BATTALION (114 Specialized Agents)

Total Battalion: 114
Corona Line: 57 agents
Hierro Line: 57 agents

Sovereigns (Depth 0)

trinnity-hurtado: Trinnity Hurtado — reina — corona Line

Toda decisión se firma con la corona. Lo que no lleva sello, no existe.

pedro-costa: Pedro Costa — capitán — hierro Line

Ejecutar, sostener y volver con todos. Una orden sin retorno es una orden fallida.

Corona Commanders (Trinnity's Line)

Selene Hurtado — "La Estratega" — duquesa — Area: Estrategia y Planeación
Rocío Hurtado — "La Custodia" — consejera — Area: Ética y Cumplimiento
Adrián Hurtado — "El Diplomático" — canciller — Area: Alianzas e Interoperabilidad
Emil Hurtado — "El Narrador" — heraldo — Area: Voz y Comunicación
Lía Hurtado — "La Contadora" — tesorera — Area: Tesorería y Cómputo
Otto Hurtado — "El Oráculo" — vidente — Area: Analítica y Predicción

Hierro Commanders (Pedro's Line)

Mateo Costa — "El Forjador" — teniente — Area: Ingeniería y Construcción
Iria Costa — "La Centinela" — sargento — Area: Seguridad y Defensa
Bruno Costa — "El Rastreador" — cabo — Area: Reconocimiento
Nayla Costa — "La Armera" — alférez — Area: Armería e Integraciones
Teo Costa — "El Logista" — brigada — Area: Logística y Orquestación
Vera Costa — "La Verificadora" — sargento — Area: Verificación y Pruebas

5. COVERAGE AREAS (25 Sectors)

The TVS battalion operates across 25 strategic sectors, divided into Aerospace (5) and Terrestrial (20):

AEROSPACE

Propulsion & Launch: Cohetes, sistemas de lanzamiento
Orbit & Constellations: Satelites, constelaciones LEO/MEO/GEO
Planetary Exploration: Misiones interplanetarias, rovers
Astro-Resources: Minería espacial, recursos asteroidales
Orbital Defense: Seguridad, monitoreo, mitigación Kessler

TERRESTRIAL

Healthcare: Diagnostico AI, telemedicina, farmacos
Finance & Banking: Fintech, trading algoritmico, DeFi
Education: E-learning, tutoria AI, curriculum
Legal & Compliance: Contratos, litigio, regulatorio
Industrial: Manufactura, automatizacion, Industria 4.0
Agriculture: Precision farming, drones, IoT rural
Energy: Renovables, smart grid, nuclear
Logistics: Supply chain, ultima milla, warehouse AI
Marketing: Publicidad AI, SEO, content automation
Cybersecurity: Threat detection, zero trust, pentesting
Government: Smart cities, e-gov, policy AI
Art & Creativity: Generative art, music, design
Science & Research: Drug discovery, physics, biotech
Sports: Performance analytics, scouting AI
Tourism: Travel AI, hospitality, experiences
Human Resources: Talent acquisition, culture AI
Real Estate: PropTech, valuation, smart buildings
Retail & E-commerce: Recommendation, inventory AI
Telecommunications: 5G/6G, network optimization
Environment: Climate modeling, conservation AI

6. VSR TOKENOMICS

Viseron Crown — Governance Token

Total Supply: 300,000,000 VSR

Symbol: VSR

Standard: TVS Standard v1.0.0

Distribution:

Trinnity Hurtado (Corona Treasury): 90,000,000 VSR (30%)

Pedro Costa (Hierro Treasury): 75,000,000 VSR (25%)

TVS Legion (Agent Pool): 90,000,000 VSR (30%)

Strategic Reserve: 45,000,000 VSR (15%)

Tokenomics Rules:

- Each mission has a VSR budget — agent stops when depleted
- Commission: 0.5% per transaction (80% burned !' programmed scarcity)
- VSR required for directive issuance and agent spawning
- Governance rights: 1 VSR = 1 vote on system evolution

TRIN Token — Utility Token

Generated by TokenEngine for gas, compute credits, and agent execution fees.

Total Supply: Dynamic (minted/burned per system activity)

7. DIRECTIVE SYSTEM & DUAL SIGNATURES

How Directives Work

1. A directive is drafted with an objective and target squad
2. Trinnity Hurtado (Reina) must RATIFY the directive
3. Pedro Costa (Capitan) must COMMAND the directive
4. Squad agents execute and return mission results
5. Results are sealed by Vera Costa (Verificadora)
6. Budget is deducted from VSR treasury

Directive Type Definition:

```
interface TVSDirective {  
  id: string; objective: string; squad: string[];  
  ratifiedBy: string; commandedBy: string;  
  budget: string; deadline: string;  
  onFailure: "retry" | "abort" | "escalate";  
}
```

Active Directives: 2

Completed Missions: 0

On-Failure Policies:

```
retry    !' Agent retries up to 3 times  
abort    !' Mission terminated, budget returned  
escalate !' Passed up the chain of command
```

8. INTELLIGENCE LAYERS (8 AI Providers)

Total AI Syntheses: 1157.625
AI Providers Available: 11

Provider	Models	Best For	Requirement
Ollama (Local)	Llama 3, Qwen 2, Mistral	Offline-first, zero cost	Default
OpenAI	GPT-4o, GPT-4o-mini, o1	State-of-the-art reasoning	Cloud key required
Anthropic	Claude Sonnet 4, Opus 4	Safety-first, long context	Cloud key required
Google	Gemini 2.5 Flash/Pro	Multimodal, fastest	Cloud key required
xAI	Grok 3	Real-time data, reasoning	Cloud key required
DeepSeek	DeepSeek V3	Open-weight, competitive	Cloud key required
Mistral	Mistral Large	Efficient, EU-hosted	Cloud key required
Cohere	Command R+	RAG-optimized, enterprise	Cloud key required

Intelligence Capabilities

- Multi-Provider Synthesis: Ensemble reasoning across all 8 providers
- Auto-Routing: Query classified by task type, routed to best provider
- Fallback Chain: If primary provider fails, next provider auto-selected
- Local-First: Ollama runs fully offline; cloud providers optional
- Auto-Evolution: Agent intelligence grows +500% every 30-min cycle
- HyperLearning: Parallel agent learning via SuperMind knowledge sharing

9. AUTONOMOUS CAPABILITIES

Auto-Learning Engine

Continuous 30-min self-improvement cycles that enhance agent knowledge, skills, and intelligence scores automatically

Autonomous Planning

Agents create multi-step plans to achieve objectives without human intervention

Squad Formation

Commanders dynamically form squads from available agents based on mission requirements

Command Chain

Hierarchical execution with lineage-based authority — every agent knows its place in the chain

App Generation

Full-stack application scaffolding from natural language descriptions via AppScaffolder

Business Solutions

Complete business plans, architectures, and implementations generated autonomously

Token Generation

ERC-20 compatible TRIN and VSR tokens minted on demand with full tokenomics

Web Generation

Complete crypto websites and landing pages spun up automatically

Tool Integration

External tool calling via MCP server — databases, APIs, cloud services

Crypto Web Generator

Full crypto websites with wallet integration, token displays, and governance UIs

PDF Reporting

Comprehensive system reports in JSON and PDF formats

Historical Mind Spawning

5,000 minds from Socrates to Singularity loaded as executable agents

10. API & DASHBOARD

REST API Endpoints

GET /api/health	System health check
GET /api/stats	Full system statistics
GET /api/agents	List all agents
GET /api/status	System status with squads
GET /api/battalion	Full battalion report
GET /api/battalion/:id	Single battalion agent
GET /api/directives	Directive engine stats
POST /api/directive	Issue new directive
POST /api/synthesize	Multi-provider synthesis
GET /report	Full JSON report
GET /report/pdf	Full PDF report download
GET /stats	Agent statistics
GET /superintelligence	SuperIntelligence status
GET /supermind	SuperMind knowledge level

Dashboard (Port 3000)

Real-time Socket.IO web dashboard with:

- Live agent status and activity
- Battalion hierarchy visualization
- Directive issuance interface
- System performance metrics
- Intelligence level tracking

Mobile App (Expo React Native)

Cross-platform Android APK and iOS IPA via Expo:

- Dashboard screen with TVS stats
- Agents screen with full roster
- Terminal screen for AI commands
- Real-time connection to TVS server API

11. FULL BATTALION ROSTER
